Fideuram Fund Equity Japan

Sub-Fund of Fideuram Fund (ISIN LU0096650055) - Class A

Management Company: Fideuram Asset Management (Ireland) dac, Intesa Sanpaolo banking group

OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund, expressed in Euro, aims to outperform the benchmark by investing essentially in equity transferable securities of issuers having their registered office or principal economic activity in Japan, listed on the stock exchange or dealt in on another regulated market in Japan. The Sub-Fund may use financial derivative instruments for the purpose of risk hedging and for investment purposes.

The Sub-fund is actively managed. The benchmark of the Sub-Fund consists of the index "MSCI Japan" Price Return in JPY converted in EUR, which is used in the investment screening process and for portfolio construction.

The relative risk and positioning to the benchmark is monitored. To provide a disciplined management approach, risk limits are set to contain investment risk. It is expected that, in normal

circumstances, a considerable part of the investments of the Sub-Fund will be components of the benchmark and the extent to which the composition of the portfolio deviate from that of the benchmark in terms of weighting will be limited. However, from time to time, performance may differ, as risk limits allow to deviate from the benchmark composition, investing in securities not included in the benchmark and using alternative weighting of securities to the benchmark.

This is a capitalization Sub-Fund.

You may request to redeem the units held at any moment, by sending a request on any bank business day to the Management Company.
