Fonditalia Global Convertibles

Sub-Fund of Fonditalia

Class R (ISIN LU0937586096) / Class S (ISIN LU0937586252) / Class T (ISIN LU0937586179)

Management Company: Fideuram Asset Management (Ireland) dac, Intesa Sanpaolo banking group

OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund, expressed in Euro, aims to obtain a positive return by globally investing in an actively managed portfolio of:

- a) convertible bonds;
- b) convertible preference shares;
- c) debt securities.

A substantial part of the Sub-Fund may be invested in debt securities characterized by a high credit risk.

The Sub-Fund may use financial derivative instruments not only for the purpose of risk hedging but also for investment purposes.

The benchmark of the Sub-Fund consists of the index "UBS Thomson Reuters Global Focus Convertible Bond" Total Return Hedged in EUR.

The Sub-fund is actively managed and the degree of freedom allowed within the management of the sub-fund is significant. The relative risk and positioning to the benchmark is monitored. To provide a disciplined management approach, risk limits are set to contain investment risk. This may impact the extent to which the composition of the portfolio and its performance deviates from that of the benchmark.

This Sub-Fund has three Unit-Classes: Class R, S, and T.

R and T are capitalization Unit-Classes.

With reference to the Unit-Class S, the net incomes of the Sub-Fund will be distributed in accordance with the Prospectus of the Fund.

You may redeem the units held at any moment, by sending a request on any business day.

Potential lower reward

Higher risk

- This Sub-Fund is classified in the risk and reward category 4 because the investments' value can be subject to daily fluctuations, both positive and negative.
- The historical data such as is used to calculate the synthetic risk and reward indicator may not be a reliable indication for the future risk profile of the Sub-Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and the categorization of the Sub-Fund may shift over time.
- Even the lowest risk category does not mean a risk-free investment.

THE SYNTHETIC RISK AND REWARD INDICATOR DOES NOT ADEQUATELY CAPTURE THE FOLLOWING RISKS:

- **Credit risk:** The Sub-Fund invests in securities whose credit rating may get worse, increasing the risk that the issuer is unable to fulfil its commitments with a negative impact on the securities' price.
- **Derivative risk:** in order to achieve its objectives, the Sub-Fund may use derivative instruments whose value may be subject to price fluctuations, positive or negative, much larger than those of the securities in the same Sub-Fund.
- **Liquidity risk:** The Sub-Fund invests in markets that can be characterized by a reduced possibility to exchange securities without a negative impact on prices.
