Class R (ISIN LU0937586336) / Class S (ISIN LU0937586500) / Class T (ISIN LU0937586419)

## OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund, expressed in Euro, has as investment objective to seek to maximize total return, by investing in:

- at least 80% of its net assets, fixed income securities denominated in currencies of emerging markets countries and in forwards or derivatives that give exposure to said fixed income securities;
- fixed income and non-fixed income instruments whose return is based on the return of an emerging market security, such as a derivative instrument, rather than investing directly in emerging market securities;
- high yield securities, such as high risk bonds, also by investing all of its assets, subject to a maximum of 15% of its total net assets in securities rated below B by Moody's, or equivalently rated by S&P or Fitch.

The Sub-Fund likely will concentrate its investments in Asia, Africa, the Middle East, Latin America and the Developing Countries in Europe.

The Sub-Fund may invest up to 10% of its net assets in debts securities issued by Mainland China issuers through the Bond Connect Program.

The Sub-Fund may use financial derivative instruments for the purpose of risk hedging and for investment purposes.

The benchmark of the Sub-Fund consists of the index "JP Morgan GBI EM Global Diversified Composite Total Return in USD Unhedged and converted in EUR". The Sub-fund is actively managed and the degree of freedom allowed within the management of the sub-fund is significant. The relative risk and positioning to the benchmark is monitored. To provide a disciplined management approach, risk limits are set to contain investment risk. This may impact the extent to which the composition of the portfolio and its performance deviate from that of the benchmark.

R and T are capitalization Unit-Classes.

With reference to the Unit-Classes S, the net incomes of the Sub-Fund will be distributed in accordance with the Prospectus of the Fund.

You may request to redeem the units held at any moment, by sending a request on any business day.

## RISK AND REWARD PROFILE

Lower risk

Potential lower reward

Higher risk

Potential higher reward

- This Sub-Fund is classified in the risk and reward category 4 because the investments' value can be subject to daily fluctuations, both positive and negative.
- The historical data such as is used to calculate the synthetic risk and reward indicator may not be a reliable indication for the future risk profile of the Sub-Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and the categorization of the Sub-Fund may shift over time.
- Even the lowest risk category does not mean a risk-free investment.

### THE SYNTHETIC RISK AND REWARD INDICATOR DOES NOT ADEQUATELY CAPTURE THE FOLLOWING RISKS:

- Credit risk:** The Sub-Fund invests in securities whose credit rating may get worse, increasing the risk that the issuer is unable to fulfil its commitments with a negative impact on the securities' price.
- Developing market risk:** The Sub-Fund is exposed to securities highly sensitive to political and economic instability of developing countries such as civil conflicts, changes in government policies and

in taxation, currency fluctuations and other developments in the laws and regulations of countries in which investments may be made. Price changes may be higher than those in the markets of developed countries.

- Derivative risk:** in order to achieve its objectives, the Sub-Fund may use derivative instruments whose value may be subject to price fluctuations, positive or negative, much larger than those of the securities in the same Sub-Fund.
- Liquidity risk:** The Sub-Fund invests in markets that can be characterized by a reduced possibility to exchange securities without a negative impact on prices.
- China Risk:** Investing in the People's Republic of China (PRC) is subject to the risks of investing in emerging markets and additional risks, which are specific to the PRC market. In case of investment in China A shares and/or in debt securities issued by Mainland China issuers where securities are held in custody on a cross-border basis, there are specific legal/beneficial ownership risks linked to compulsory requirements of the local central securities depositories.
