OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund, expressed in Euro, is a fixed income fund and aims to maximize the total return on investment through a diversified portfolio with a 6 years investment period, starting from 28th July 2017. The Sub-Fund is suitable for investors who search medium term investments and the investor must be able to accept a certain volatility and the possibility of losing part of the invested amount. The Sub-Fund has been designed for investors who will invest in the Sub-Fund during the Initial Subscription Period and will hold their investment until the end of the Principal Investment Period. Return expectations may differ for investors who will not hold their investment until the end of the Principal Investment Period. The Sub-Fund will seek to achieve its investment objective by investing in a diversified portfolio, primarily consisting of fixed income securities issued by corporations, other non-government issuers, governments and government related issuers located predominantly in Western Europe as well as other developed and emerging markets and denominated in global currencies. The Sub-Fund can invest, up to 100% of the net asset value of the Sub-Fund, in transferable debt securities and/or money market instruments including securities with a rating below "BBB-", or equivalent and above or equal to "CCC" or equivalent, (non-investment grade) or cash represented specifically by bank deposits of credit institutions with a residual maturity date below 12 months. Up to 25% of the net asset value can be invested in transferable debt securities and/or in money market instruments issued by company or government domiciled in emerging markets. Up to 10% of the net asset value can be invested in UCITS and/or

other UCIs that invest in fixed income instruments. The Sub-Fund may invest up to 10% of its net asset value (cumulatively) in asset backed securities (ABS) issued by corporate issuers (no SPVs). The Sub-Fund will not invest in distressed securities nor in default securities. The maturity date of the debt securities components changes over time, according to investment targets and specific markets development approaching the end of the investment period. After the end of the investment period (i.e. after the 6th year) the Sub-Fund can be invested exclusively in short term transferable debt securities, money market instruments, cash or cash equivalents (composed primarily of bank deposits of credit institutions) each with a residual maturity date of less than 12 months. Concerning investment in currencies different from Euro, the investment manager will normally use strategies to hedge currency risks. The Sub-Fund may use financial derivative instruments not only for the purpose of risk hedging but also for investment purposes. During the Initial Subscription Period (from 6th June 2017 to 27th July 2017) the Sub-Fund will hold 100% of its assets in cash, denominated in Euro. The Sub-Fund has no benchmark.
