Fonditalia Fidelity Equity Low Volatility

Sub-Fund of Fonditalia

Class R (ISIN LU2274958557) / Class T (ISIN LU2274958631)

Management Company: Fideuram Asset Management (Ireland) dac, Intesa Sanpaolo banking group

OBJECTIVES AND INVESTMENT POLICY

The sub-fund, expressed in EUR, aims to achieve long-term capital growth by investing primarily in equity transferable securities issued by entities without any geographical, sectors and/or industries limitations. The sub-fund strategy aims to provide a lower level of volatility compared to the global equity market by generally selecting low volatility securities.

The sub-fund will seek to achieve its investment objective by investing in a diversified portfolio consisting primarily of equity transferable securities listed on a stock exchange or dealt in any regulated market worldwide, including in depository receipts (such as American depository receipts ("ADRs"), European depository receipts ("EDRs") and global depository receipts ("GDRs")).

The sub-fund may invest:

- up to 10% of its net assets in instruments issued by entities located in emerging market countries;
- up to 10% of its net assets in China A-Shares via the Shanghai-Hong Kong Stock Connect program;
- up to 10% of its net assets in money market instruments and cash;
- up to 40% of its net assets in units/shares of UCITS and/or other UCIs, including ETFs, which provide exposure to the mentioned asset classes.

The sub-fund may invest without limitation in securities denominated in currencies other than the reference currency (EURO). The currency exposure of the sub-fund is flexibly managed.

The sub-fund may use financial derivative instruments for the purpose of investment and risk hedging.

The Sub-Fund will not enter into total return swaps nor in repurchase or reverse repurchase agreements.

The Sub-fund is suitable for investors who search long term investments. The investor must be able to accept a certain volatility and the possibility of losing part of the invested amount.

The benchmark of the sub-fund consists of the index 'MSCI World' Price return, expressed in USD and converted in EUR. The sub-fund is actively managed and the degree of freedom allowed within the management of the sub-fund is significant. The relative risk and positioning to the benchmark is monitored. To provide a disciplined management approach, risk limits are set to contain investment risk. It is expected that, in normal circumstances, a significant part of the investments of the sub-fund will be components of the benchmark, however there is discretion to invest in other securities not included in the benchmark.

This Sub-Fund has two Unit-Classes: Class R and T.

R and T are capitalization Unit-Classes.

You may request to redeem the units held at any moment, by sending a request on any business day.
