Willerbond European Currencies

Sub-Fund of Willerfunds

Class P-CHF (ISIN LU1155044446)

Management Company: Fideuram Asset Management (Ireland) dac, Intesa Sanpaolo banking group

OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund, expressed in EUR, invests most of its Net Asset Value in straight bonds denominated in the main European currencies. The Investment Manager is authorised to use financial derivatives for investment and risk hedging purposes. The Sub-Fund may also hold convertible bonds and bonds with warrants on an ancillary basis.

The Sub-Fund may be fully invested in Cash where the Investment Manager believes that market circumstances require it, in order to protect the interests of the Unit Holders. The Sub-fund does not fall within the scope of the regulation (UE) 2017/1131 on money market funds.

Investors are aware that the prospective return offered by this strategy may not be as high over the long-term as that for Sub-Funds that invest in equities; conversely, however, the level of risk is lower.

The Sub-Fund is actively managed.

The Sub-Fund is not managed in reference to a benchmark.

This is a capitalisation Sub-Fund that re-invests all its revenue. Units in the classes denominated in a currency other than the Reference Currency shall be hedged against the Sub-Fund's Reference Currency. You may request to redeem the units held at any moment, by sending a request on any business day.

RISK AND REWARD PROFILE

Higher risk

- This Sub-Fund is classified in the risk and reward category 2 because the investments' value shows low fluctuations, both positive and negative.
- The historical data such as is used to calculate the synthetic risk and reward indicator may not be a reliable indication for the future risk profile of the Sub-Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and the categorization of the Sub-Fund may shift over time.
- Even the lowest risk category does not mean a risk-free investment.

THE SYNTHETIC RISK AND REWARD INDICATOR DOES NOT ADEQUATELY CAPTURE THE FOLLOWING RISKS:

- **Credit risk:** The Sub-Fund invests in securities whose credit rating may get worse, increasing the risk that the issuer is unable to fulfil its commitments with a negative impact on the securities' price.
- **Liquidity risk:** The Sub-Fund invests in markets that can be characterized by a reduced possibility to exchange securities without a negative impact on prices.
- **Operational Risk:** risk that operational processes, including those related to quantitative trading models implementation and to the safekeeping of assets may fail, resulting in losses.
