WHAT IS THE PRODUCT?

Type:

Umbrella investment company with variable capital (société d'investissement à capital variable) incorporated as a public limited company (société anonyme) in the Grand Duchy of Luxembourg, qualifying as an undertaking for collective investment in transferable securities (UCITS) under Part I of the Luxembourg Law dated December 17, 2010.

Term:

This sub-fund is not subject to any fixed term. The SICAV's liquidation shall be decided by the general meeting of shareholders, in accordance with the applicable law and the Articles of Incorporation. The Company may also enter into liquidation by judicial decision according to the Law of December 17, 2010. The Board of Directors may decide to liquidate the Sub-Fund in case of extraordinary events such as changes in the political, economical or monetary situation or when the net asset of the Sub-Fund is less than a minimum level for the Sub-Fund to be operated in an economically efficient manner, as further described in the Prospectus.

Objectives:

The D-X Bloomberg Diversified Commodities and Strategic Metals UCITS ETF Sub-fund measured in Euro, is passively managed and aims to track the performance of the Bloomberg Commodity Carbon Tilted, Transition Metals & Gold Index, Total Return in EUR, (the "Index"). The Sub-fund aims to minimize the tracking error between the net asset value of the Sub-fund and the performance of the Index. The calculation of the Index follows the Bloomberg Global Commodity Liquidity Weighted Indices Methodology. The Index is a composite commodity benchmark which consists of the arithmetical weighted average of the following indices:

- 80% - Bloomberg Commodity Carbon Tilted Index, Excess Return in USD
- 13% - Bloomberg Global Commodity Transition Metals Index, Excess Return in USD
- 7% - Bloomberg Gold Subindex, Excess Return in USD

The Index methodology, composition, revision rules and additional information concerning the underlying constituents of the Index are available on <https://www.bloomberg.com/professional/products/indices/documentation> and <https://assets.bbhub.io/professional/sites/27/Bloomberg-Global-Commodity-Carbon-Tilted-Transition-Metals-and-Gold-Indices.pdf>

The Sub-fund seeks to deliver the performance of the Index by entering into one or several Swaps. The purpose of the Swaps is to gain indirect exposure to the Index. The Sub-fund may invest in treasury bills, government bonds and cash which, together with the Swaps' return, seek to deliver a return which aims to track the performance of the Index. The Sub-fund aims to minimize the tracking error between the net asset value of the Sub-fund and the performance of the Index. In order to achieve its investment objective, the Sub-fund invests all, or substantially all of its net assets in:

- Swaps (each swap being an agreement between the Investment Manager on behalf of the Sub-Fund and an Approved Counterparty (as defined below)) to exchange one stream of cash flow against another stream pursuant to a master agreement in accordance with the requirements of the International Swaps and Derivatives Association, and such swaps will be funded, unfunded or total return swaps ("Swaps"). The purpose of the Swaps shall be to gain indirect exposure to the Index.
- A diversified portfolio of developed market government notes and bonds and Treasury Bills.
- Currency forwards for currency hedging purposes.
- Commercial papers and certificates of deposit.
- Ancillary liquid assets

The Sub-fund uses financial derivative instruments for the purpose of currency risk hedging, and for investment purposes. The derivative instruments in which the Sub-fund may invest include, but are not limited to, exchange traded and over-the counter options, futures, spot and forward contracts, total return swaps (funded/unfunded) and currency forward.

The holding of ancillary liquid assets is limited to 20% of the net assets of the Sub-fund. Under exceptionally unfavorable market conditions and on a temporary basis, this limit may be increased to 100% of its net assets, if justified in the interest of the investors.

The aim is to use total return swaps on a continuous basis.

The Sub-fund will not enter into repurchase or reverse repurchase agreements.

This is a capitalization class.

You may request to redeem the share held at any moment, in accordance with the Prospectus.
