WHAT IS THE PRODUCT?

Type:

Umbrella investment company with variable capital (société d'investissement à capital variable) incorporated as a public limited company (société anonyme) in the Grand Duchy of Luxembourg, qualifying as an undertaking for collective investment in transferable securities (UCITS) under Part I of the Luxembourg Law dated December 17, 2010.

Term:

This sub-fund is not subject to any fixed term. The SICAV's liquidation shall be decided by the general meeting of shareholders, in accordance with the applicable law and the Articles of Incorporation. The Company may also enter into liquidation by judicial decision according to the Law of December 17, 2010. The Board of Directors may decide to liquidate the sub-fund in case of extraordinary events such as changes in the political, economical or monetary situation or when the net asset of the sub-fund is less than a minimum level for the sub-fund to be operated in an economically efficient manner, as further described in the Prospectus.

Objectives:

The Sub-Fund has been categorized as an ESG Promotion Strategy Sub-fund in accordance with article 8 of the SFDR.

The Sub-Fund, expressed in EURO, aims at achieving long-term capital growth by investing primarily in equity transferable securities issued by entities without any geographical limitations, including emerging markets. The Sub-Fund will not have any restrictions in selecting securities in terms of sectors. The Sub-Fund will invest in equity transferable securities representative of investment themes with a strategy that seeks to align asset selection of sectors involved in social, economic or corporate topics prevalent in society (by way of example, technology and innovation, consumer and natural resources). However, the Sub-Fund may also invest in equity transferable securities issued by issuers active in more traditional sectors, including but not limited in financial, real estate and infrastructure sectors. The Sub-Fund may also actively manage equity transferable securities focused on investment styles. The thematic allocation will be actively managed. Themes are selected by means of fundamental analysis (mostly valuation and earnings growth) and technical analysis in order to have a dynamic rotation among the different themes. The thematic allocation may lead to a sector exposure eventually focused on few sectors and significantly different from the one of the benchmark.

The Sub-Fund may invest its net assets:

- up to 50% in equity transferable securities issued by entities located in emerging markets;
- up to 30% of its net assets in China A-Shares via the Shanghai-Hong Kong Stock Connect program;
- up to 15% in investment grade fixed income instruments;
- up to 10% in units/shares of UCITS and/or other UCIs, including ETFs.
- up to 15% in close-ended real estate investment trusts (REITS)

The Sub-Fund may invest without limitation in securities denominated in currencies other than the reference currency (EURO). The currency exposure of the sub-fund is flexibly managed. The Sub-Fund may use financial derivative instruments for the purpose of risk hedging and for investment purposes.

The Sub-Fund will enter into Total Return Swaps.

The benchmark of the sub-fund consists of the index MSCI All Country World Net Total Return, Hedged in EUR.

The Sub-Fund is actively managed and the degree of freedom allowed within the management of the sub-fund is significant. The relative risk and positioning to the benchmark is monitored. To provide a disciplined management approach, risk limits are set to contain investment risk. It is expected that, in normal circumstances, a significant part of the investments of the sub-fund will be components of the benchmark, however there is discretion to invest in other securities not included in the benchmark.

The hedged class is covered against the exchange rate risk by a hedging strategy on currencies.

This is a capitalization Share-Class.

You may request to redeem the share held at any moment, in accordance with the Prospectus.

Intended Retail Investor:

The Sub-fund is suitable for investors who look for long term investments and have a preference for sustainable ESG strategies. The investor must be able to accept a certain volatility and the possibility of losing a part of the invested amount. This product is for investors who meet the conditions for accessing the product in question (see prospectus) with any level of knowledge and experience.
